SKILLS

Programming & Data Engineering: Python, SQL, Powershell, pandas, NumPy, BigQuery, Snowflake, Data Modeling, ETL/ELT
Data Analytics & Machine Learning: Excel, PowerBI, Tableau, Statistical Analysis, EDA, A/B Testing, Feature Engineering, Model Evaluation, scikit-learn
Development & Infrastructure: Docker, Kubernetes, Git, GitHub, Django, Linux
Other: Network Security, Digital Forensics, Volatility
Language: Thai (Native), English(Upper Intermediate)

EDUCATION

Thammasat University **2023-Present** **Expected 2027**
Bachelor of Data Science and Innovation in IS | Module: Cybersecurity | Cumulative GPA: 3.33/4.00

WORK EXPERIENCE

Business Administration Intern **UMEDA Co., Ltd. (Bangkok, TH)** **June 2026 - August 2026**
Supported the Marketing team at a pharmaceutical company by turning sales and pricing data into concise information for management discussions.

- Summarized pharmaceutical sales in Excel by company and Product across government, private, and over-the-counter (OTC) channels; ranked products and manufacturers by sales.
- Compared hospital and reference prices and used Excel trend and forecast tools to estimate future phamaceutical prices.
- Created Power BI dashboards, Excel summary tables, and PowerPoint slides showing sales rankings and price comparisons for Marketing presentations to executives.

PROJECTS

Portfolio website:

Thrive - Rehabilitation Data Analysis **January 2026-Present**
Academic project for the Ministry of Justice's Kamlangjai program, via an academic advisor

- Linked corrections and probation records using Python and SQL (DuckDB), and stored person-level datasets in Parquet for rehabilitation analysis.
- Compared occupational-grant recipients (the program's role-model group) with non-recipients stratified by sex, age band, and prisoner classification.
- Applied weighted statistical comparisons and multiple-testing correction in Python, and Presented associated factors dashboards for rehabilitation planning.

Student Dropout Risk Research **August 2025 - December 2025**
Academic Research Project

- Analyzed records for 20,919 undergraduates in Python, compared logistic regression, random forest and XGBoost to predict dropout risk after Terms 1, 2 and 3 or later.
- Achieved a ROC-AUC of 0.992 and an F1 score of 0.926 with XGBoost using 34 features in the Term 3 evaluation.
- Co-authored A Machine Learning-Based Student Dropout Risk Prediction and Early Warning System, accepted for publication in Asian Health, Science and Technology Reports, 34(4), October-December 2026.

ArguSQL
Personal SQL Application

- Delivered an Electron-based Windows desktop SQL workspace with DuckDB for querying CSV, TSV, Parquet, JSON and JSONL files and exporting results as CSV.
- Implemented live query previews, SQL autocomplete, visual JOIN generation, and saved query tabs so users could explore and combine local datasets in one workspace.
